SPOLIER INSTALLATION INSTRUCTIONS

SPOLIER KIT PARTS:

Rear Spoiler	Bolts
Washers	Spoiler Gaskets
Plastic Locators	LED Light (with certain models)

REQUIRED TOOLS:

9mm Drill	1/8" Drill Bit
1/4" Drill Bit	1/2" Drill Bit
Masking Tape	Silicone-based Caulk
Panel Puller	(with certain models)

PRE-FITMENT:

Read all instructions before installing. Please inspect your spoiler for proper fit before painting or mounting on your vehicle. **Parts that have been sanded, painted, drilled or modified cannot be returned.**

CAUTION:

Do not fill, cover or obstruct vent holes in the bottom of the spoiler. **Bolts supplied are universal in length.** Prefit these by hand inside spoiler's leg mounting locations before installation is done. Once spoiler is being installed on trunk use extra washers if bolt is longer than the depth of mounting location. You may also buy the correct bolt measurement at a local hardware store.

PROCEDURE:

1. Prior to installation, thoroughly clean the deck/hatch lid with a wax and grease remover.
2. Flip the spoiler upside down on top of a smooth surface, making sure it does not mark or scratch the spoiler, with the bottom of the legs facing upwards.
3. Install the gaskets by removing its protective liner and place them on the bottom of the spoiler's leg. If the spoiler requires the led stoplight, install it at this time with the screws supplied.
4. Insert the plastic locator strips into each of the holes. A small piece of masking tape will help hold it temporarily into place. (See Illustration 1)
5. Flip the spoiler back with the bottom of its legs facing down towards the deck lid.
6. Place the spoiler on the closed deck lid and move the spoiler towards the desired mounting position. (See Illustration 2)
 - a. For Hyper Wing, Hyper Extreme and Ultra Hyper applications, refer to back page with supplemental instructions. Make sure that the leg, where the bolts will be attached, is on the deck lid and not on the quarter panel.
7. Secure the locator strips to the deck lid by placing masking tape to ensure positioning of the spoiler onto the vehicle. (See Illustration 3)
 - a. **Do not move the spoiler since this will be the final place where it will be installed.**

8. Remove the spoiler by lifting it straight up; a flat screwdriver is used for detaching locator strip from the spoiler's leg. This leaves the locator strips attached to the deck lid. For spoilers with an LED stoplight, while lifting up the side where the wire comes out of, mark the spot lightly with the tip of the screwdriver for the brake light wire hole location.
9. It may be necessary to re-attach more masking tape closer to the hole location. This will let you open the trunk to check for any obstructions underneath. Remove any trim panels or carpeted trunk mats at this time. If this is not the best suitable location, repeat steps 6-8 on the new mounting position by moving the spoiler either back or forward.
10. Prep the deck lid up slightly; this will ensure no damage will occur to the deck lid's gasket or the vehicle's body while drilling, and drill 1/8" pilot holes on all locator strip holes. (See Illustration 3) If the deck lid contains a double layer drill straight through inner layer also. Then proceed to widen the holes using a 1/4" drill bit on the top layer.
11. If the deck lid has a double layer use a 1/2" drill bit to drill up through the inner layer. This will allow the bolt head to tightly secure against the top layer. **Do not drill a 1/2" hole through the top layer. This will cause serious damage to vehicle.**
12. With the spoiler facing up, on step 2, apply a small amount of silicone-based caulk around the drilled holes. This will prevent leakage and rusting.
13. While positioning the spoiler on the deck lid, insert the LED stop lamp wire through its corresponding hole and mount the spoiler with the bolts and washers supplied. **Remember never to over tighten the bolts; this will cause serious damage to the spoiler.**
14. Run the LED wire down the deck lid's support arm and connect it to the third brake light.
15. Reinstall any panels or other items removed earlier and clean vehicle thoroughly and carefully so as to not scratch the vehicle's surface.

OPENING ORDER: \$500

PAYMENT: COD, Visa, MC, AMEX, DISCOVER, CASHIER'S CHECK/Money Orders, Wire Transfers, I/C

SHIPPING: UPS, USPS, TRUCK FREIGHT, CONTAINER

RETURNS: ONLY AUTHORIZED RETURNS WILL BE ACCEPTED

Copyright © 2011 M&O International Inc. All Rights Reserved

M&O International continues to emerge as the spoiler industry leader with our brand Hyper Wings USA®. We carry a vast selection of rear spoilers and have the largest number of applications ranging from new to older vehicles in the following materials:

- ▶ ABS Plastic
- ▶ Hand Laid Fiberglass
- ▶ HyperFlex® Fiberglass
- ▶ Carbon fiber

We continually innovate the finest and hottest spoiler styles to Set The Trend in the automotive market. Our staff shares a passion for the automotive aftermarket and from this dedication we continually add new product lines.

Our newest product lines which include GX300® Performance and Torox® are the perfect addition to our Hyper Wings USA® product line. Both these product lines have developed into a complete family of accessory products. GX300® has collectively expanded to include our newest interior and exterior lighting product lines while Torox® has concentrated into more exterior products for that unique off-road look and also the more refined vehicle appearance.

At M&O International we strive to implement the best manufacturing techniques to ensure all parts fit adequately as our reputation precedes us. We want you to make the ultimate statement in Quality, Style and Performance and M&O International is your answer. With this ever growing market you need a company to back you up with variety and a great selection of parts. By implementing these actions, and along with your support, M&O International has paved the way towards growth for years to come.

Thank you for making us succeed and for your business!

TALK TO THE EXPERTS

Let our knowledgeable staff assist you or speak directly to our Manufacturing Engineers.

CUSTOM MANUFACTURING

You need a part manufactured whether it is a spoiler, body kit, hoods, fenders, motorcycle accessories etc. we can design or re-engineer these custom tailored to your specifications.

PRE-PAINTED PROGRAM

Whether you need your parts primed or painted we handle it all.

XTRAFLEX SLIM (SMD-LED) LIGHT STRIPS

XtraFlex GX₁₀₀₀ SMD (LED) Strips are wafer thin and flexible. LED Light Strips are perfect for tight locations requiring a slim lighting application.

Exterior

Grill Mount

Interior

Under Dash

- ▶ High Power SMD(LED)'s provide maximum lighting power output
- ▶ Form-fitting Flexible design fits in any location
- ▶ Installs in minutes via pre-applied double sided tape
- ▶ Multi use- Floorboard, console, speaker box, 3rd brake light/red), grill, headlight, taillight accent and more...
- ▶ InterLink Circuitry allows for multiple strip connections inLine

KIT INCLUDES

- ▶ (2)-1'/12" XTRA FLEXIBLE SLIM LED SILICONE ENCASED LIGHT STRIPS
- ▶ (2)-LIGHT STRIP CONNECTORS WITH WIRES
- ▶ (1)- QUICK CONNECT INTERLINK CONNECTOR

Quick Connectors Allow Size Customization forming Single 12" lights strips into Multiple 12" Light Strip Sections

HALO (SMD-LED) LIGHTS

The GX₁₀₀₀ Halo LED lights can be installed in virtually every headlight. These lights will surely add style and great looks to your vehicle like the newer high end class european cars.

- ▶ High Power SMD(LED)'s provide maximum lighting power output
- ▶ No filament or tube to break like CCF halos
- ▶ Lasts up to 5x longer than CCF halos
- ▶ No ballasts to replace

Sizes

HS70W - 70mm

HS90W - 90mm

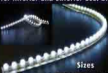

- 70mm size fits most small halos
- 90mm size fits most large halos

LED FLEX STRIPS

The GX₁₀₀₀ LED Flex Strips offer multiple uses for interior and exterior use. Bright LED lights will add that Euro look to any vehicle.

- ▶ Bright LED's provide maximum lighting power output
- ▶ Form-fitting Flexible design

Sizes

L3324W - 24cm

L3348W - 48cm

L3372W - 72cm

L3396W - 96cm

TAILGATE (SMD-LED) LIGHT STRIPS

The GX3000 SMD(LED) Tailgate Light Bar illuminates the tailgate of mini and full size pickup trucks. These LED Tailgate Light Strips enhance vehicle safety by functioning as an additional Brake light, Reverse light, Left turn signal, and Right turn signal

- ▶ High Power SMD(LED) circuit board provides maximum lighting power output
- ▶ Form-fitting Flexible design fits every vehicle up to 70" size. ONE SIZE FITS ALL!
- ▶ Can be Cut easily to fit the vehicles Exact Size preventing unwanted gaps
- ▶ Installs in minutes via pre-applied double sided tape
- ▶ Available in RED/WHITE SMD LED's
- ▶ Provides more visibility to driver's behind you
- ▶ Weatherproof - will not leak or build condensation

DOME/ACCESSORY LIGHTS (SMD-LED)

Replace and Upgrade all interior factory lights for better visibility

- ▶ High Power SMD(LED) circuit board provides maximum lighting power output
- ▶ Installs Quickly and Easily with the included universal connectors
- ▶ Fits virtually all dome lights, map lights, visor lights, trunk lights and more...

INTERIOR USE
ONLY!

IDEAL FOR MAP LIGHTS AND SMALLER LIGHTS
20mm X 32 mm size

IDEAL FOR DOME LIGHT AND BIGGER LIGHTS
40mm x 32 mm Size

GRIP PAD

The GX300® Grip Pad uses patented technology to keep your cell phone and other valuables from slipping and sliding while in your vehicle, home or office. Simply place the Grip Pad on flat non porous surface, press your item firmly onto pad and watch them magically stay in place.

- Grips firmly
- Anti slip surface
- Moveable/Reusable
- Non-adhesive/non-magnetic
- Washable
- Temperature resistant

WIPERS

GXAero Flex — the latest in universal wiper blade technology — offers superior performance, easy installation and an affordable price. The frameless design wiper structure doesn't allow and eliminates areas for snow, ice and road debris to clog the wiper, providing excellent visibility in all types of weather.

Features and Benefits

- Used by OE Auto Manufacturers Worldwide
- Innovative design provides uniform wipe to help eliminate streaking
- Memory Curve provides uniform pressure for the clearest wipe
- Provides 100% constant windshield pressure for maximum contact
- Easy Connection Technology offers quick and easy wiper replacement
- Available in 14" to 26" lengths
- Wipers sold individually
